Jake Hui Wang

646-206-5709 | Jakeww.com | Huiwang339@gmail.com | GitHub | Medium

Full stack web developer with a passion for building applications that make our lives easier. With experience in Ruby on Rails and JavaScript based programming, I want to help enable companies to build apps and take care of their customers in the best way possible.

TECHNICAL PROJECTS

Parallel - Github | Demo | Link: Parallel
Rent a driveway or list your driveway. An Airbnb for cars.
Integrated Google Maps, Airbnb Dates, and other packages to help organize information.
Created front end with Redux and React. Backend created with Ruby on Rails and Postgres.
Increased security by utilizing JWT Tokens for authorization and authentication.

Bit Regret Github | Link: BitRegret.cc
How much cryptocurrency would be worth today if you invested earlier.
Used React and Redux to build a single page cryptocurrency application.
Incorporated Bootstrap for a clean and modern UI.
Asynchronously imported data from multiple APIs.

Lets - Github | Demo | Link: Lets-events.herokuapp.com
Events Social Networking Application
Created a follower/following social networking app using Ruby on Rails.
Designed the user experience using Semantic UI.
Built using the model-view-controller (MVC) design pattern.

TECHNICAL SKILLS

Javascript, NodeJS, React, Redux, Ruby, Ruby On Rails, SQL, HTML, CSS, Bootstrap, Semantic UI
